Create Printed Menus and Brochures Without an Extra Thought

With Summer just around the corner, your restaurant may be considering menu changes, or just price changes to your current menu. In either case, your website will need to be updated, and your printed menus will also need to be re-edited, arranged and re-printed. We know that you've got a ton of other things to be doing in preparation for this coming summer so we've made that job a synch!

Use a convenient dashboard on your own website where you can add and arrange menu sections like Desserts and Entrées, add the various menu items within those sections, and add the single price of the item, or even the variety of pricing that often accompanies an item for things like small, medium and large. The

system even has a place for cuisine pictures, so you can add imagery to an online menu or to your printed menu. **Voilà, Your cuisine menu is now available** for a customized web presence that is beautiful and clear across any display. phones, tablets, laptops, and best of all **styled as a perfectly arranged, high-resolution PDFs**, printable on the perfect sized paper stock.

This system accommodates a variety of paneled layouts that fit on 1, 2, 3 and 4 fold brochures of popular sizes like

- Letter (8.5"x11") - 6 panel / 2 fold
- Legal (8.5"x14") - 8 panel / 3 fold &
- Executive (17"x11") - 8 panel / 3 fold

additional layouts can be fitted for anything from a business card to a billboard.

We design **intelligently responsive** websites with Drupal. This lets us build amazing websites that can catalog and present anything your business needs to deal with. We build websites that are SEO compliant with Google's new "Mobile First Indexing", a strategy that recognizes the fact that in 2018, more than 70% of all web searches are beginning from phones.
